SATCHEL OF UNMET NEEDS

Wondrous Item, Uncommon

This bag resembles a *Bag of Holding* but resists any attempt to place objects into it. On the underside of the front flap is an embroidered message: "*Sdeen temmur uoyro fedivor pot tub dlohot tsixet onodi.*"

The bag weighs about 20 pounds despite appearing empty and rattles when shaken as though stuffed to the brim with glass, wood, and metal objects.

Anyone can reach into the bag, speak aloud the name of one of the objects listed below, and retrieve it. When placed back into the bag, the item will vanish and can be recalled at any time by reaching into the bag again. A second of the same object cannot be produced while the first still exists.

If an item retrieved from the bag is destroyed or remains outside the bag for 24 hours, all matter comprising it vanishes into thin air. That item will be "missing" from the bag, unable to be retrieved, until 3 dawns have passed.

You can procure the following objects from the Satchel of Unmet Needs:

- A piece of chalk, a pencil, or a pen and ink bottle
- A bedroll and blanket
- A crowbar
- A bell, chime, or signal whistle
- An empty glass flask, vial, or bottle
- Up to 30 feet of hempen rope or up to 15 feet of chain
- A block and tackle
- A mundane lock and matching key
- An abacus
- A hooded or bullseye lantern
- A wooden bucket or iron pot
- A tinderbox
- A magnifying glass
- A steel mirror
- A ten-foot pole
- A folded two-person tent

The best software for the job is WizDMG, a Windows-based desktop solution for authoring Apple's disk image files in a non-Mac environment.. WizDMG requires no technical expertise to use Disk Utility has a good burn success rate, so hopefully you won't have to repeat the process to get it right.. Look at dmg windows

Method 2: How to Burn DMG to USB in Windows 10 (Bootable)Since Windows doesn't natively support DMG files, you will need to first download and install a utility that can handle such disk images.
